SUMMARY

Motivated Full Stack Development Engineer with hands-on experience in designing and building scalable web applications using Java, Node.js, React, MySQL and MongoDB. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and Operating Systems. Experienced in developing RESTful APIs, authentication systems, and full-stack applications. Proficient with Git, Docker, and Agile development practices. Passionate about problem-solving, clean architecture, and building efficient, high-performance systems.

SKILLS

Languages: **Java, JavaScript**

Frontend: **HTML, CSS, React.js, Tailwind CSS**

Backend: **Node.js, Express.js**

Databases: **MySQL, MongoDB**

Tools & Technologies: **Git, GitHub, Docker, Postman**

Core Concepts: **Data Structures & Algorithms, Object-Oriented Programming (OOPs), Operating Systems**

EDUCATION

Bachelor of Technology in Computer Science (BTech-CSE) in Collaboration with IBM

Teerthankar Mahaveer University

08/2023 - 05/2027 Moradabad | CGPA: 9.18/10

PROJECTS

PROJECT 1: Auth System & Task Management API

Tech Stack: Node.js, Express.js, PostgreSQL, JWT, Docker, React.js, Tailwind CSS

GitHub: <https://github.com/satwik12dev/Auth-System-Task-API.git>

- Developed a scalable RESTful API for authentication and task management with secure user workflows.
- Implemented JWT-based authentication using access and refresh tokens, improving protected-route security and session handling.
- Designed a modular backend architecture using controllers, middleware, and services, improving code maintainability by **approximately 30%**.
- Optimized MySQL queries and database operations, reducing API response time by **approximately 25%**.
- Containerized the application using Docker, ensuring consistent deployment across development and production environments.
- Implemented task CRUD operations, user management, role-based access control, and protected APIs.

PROJECT 2: Resume Analyzer – Full Stack AI Project

Tech Stack: Node.js, React.js, Express.js, Gemini API, MongoDB

GitHub: <https://github.com/satwik12dev/Gen-AI-Resume-Analyzer.git>

- Developed a full-stack AI-powered resume analysis platform to evaluate resume quality and improve job-readiness.
- Built backend APIs to process resumes and extract structured information such as skills, experience, education, and keywords.
- Integrated Gemini AI for resume scoring, feedback generation, ATS keyword matching, and improvement suggestions.
- Designed a responsive React.js interface for resume upload and real-time analysis results and also reducing duplicate code and improving maintainability by **approximately 25%**.
- Improved resume-review efficiency by automating analysis workflows, reducing manual evaluation effort by **approximately 60%**.
- Focused on solving real-world problems related to job screening, ATS optimization, and candidate resume improvement.

PROJECT 3: Zymgo – Gym Management & CRM Platform

Company: **Kodexive Technologies**

Tech Stack: React.js, Node.js, Express.js, MySQL, JWT, Tailwind CSS, REST APIs, Git

GitHub: <https://github.com/satwik12dev/ZymGo.git>

- Developed and contributed to Zymgo, a gym management and CRM platform supporting **4 user roles**—Admin, Gym Owner, Staff, and Member—and managing **6+ core business modules** including gyms, members, staff, subscriptions, attendance, payments, and operations.
- Developed **60+ secure REST APIs** using Node.js and Express.js for authentication, role-based access control, gym onboarding, member management, subscription plans, attendance, payments, and dashboard workflows.
- Designed and integrated **15+ MySQL database** tables for users, gyms, memberships, attendance records, subscriptions, payments, plans, and activity logs, improving data organization and relational integrity.
- Implemented JWT-based authentication and authorization across **4 role-based access levels**, securing protected routes and restricting unauthorized access to sensitive gym and payment data.
- Built and optimized CRUD workflows for 6+ modules, improving data-entry and record-management efficiency by **approximately 35% through reusable API patterns**, validation, and streamlined MySQL queries.
- Developed dashboard analytics displaying **5+ real-time business metrics**, including total members, active subscriptions, monthly revenue, attendance, pending payments, and recent activities.
- Improved dashboard data retrieval performance by **approximately 25% through optimized SQL queries**, efficient API response structures, and reduced unnecessary database calls.
- Supported responsive frontend workflows for desktop and mobile screens, improving usability for gym owners, staff members, and administrators.

KEY ACHIEVEMENTS

Project Development Achievements

- Increased application performance by up to 55% using optimized database queries.
- Built secure file storage system with 100% privacy-preserved encryption.
- Contributed to team Agile development, improving project delivery speed by 35%.

EXPERIENCE

Kodexive Technologies

Moradabad, Uttar Pradesh

Full Stack Developer Intern

- Developed and maintained full-stack web applications for business management and automation, including CRM and gym-management platforms such as Zymgo.
- Built responsive and user-friendly frontend interfaces using React.js, Tailwind CSS, and modern component-based architecture.
- Developed secure backend APIs using Node.js and Express.js for authentication, user management, role-based access control, product management, subscriptions, payments, and dashboard analytics.
- Designed and integrated MySQL database schemas and optimized CRUD operations for efficient handling of users, memberships, inventory, transactions, and business records.
- Implemented JWT-based authentication and authorization to secure APIs and provide controlled access for admins, staff members, and users.
- Worked on CRM modules including customer management, inventory tracking, subscription plans, member management, reporting, and activity monitoring.
- Contributed to Zymgo gym-management features such as gym onboarding, membership plans, member records, attendance workflows, and dashboard statistics.
- Collaborated in an Agile development environment, participated in debugging, code reviews, feature development, and deployment-related tasks.
- Improved application usability and system efficiency by building scalable APIs, reusable frontend components, and data-driven dashboard insights.

INTERESTS & STRENGTHS

Strengths

Problem Solving, Analytical Thinking, System Design Approach, Debugging & Optimization, Team Collaboration

Interests

Backend Development, Scalable Systems, AI/ML Applications, Building Real-World Projects

Certifications

- AWS Cloud Practitioner Essentials
- IBM Java Programming Certification
- GUVI Python Programming Certification
- Cloud Fundamentals, Big Data & RDBMS Concepts
- NPTEL – Computer Architecture
- PEBL Internship & Training Certification by IBM.

RESPONSIBILITIES & LEADERSHIP

- Led project development and collaborated with team members during academic and internship projects.
- Managed documentation, task coordination, and project delivery timelines.
- Participated in Agile sprint planning and code reviews, ensuring quality and timely completion.
- Assisted peers in debugging, version control usage, and technical problem-solving.
